**NOTA DE AGRADECIMIENTO Y RECONOCIMIENTO**

Deseamos agradecer a las siguientes personas y oficinas la ayuda recibida en la preparación de este informe. Extendemos un agradecimiento especial a:

**Oficina de Desarrollo de Sistemas de Información del Departamento de Salud, AFASS:**

Srta. Carmen S. Ayoroa - Directora ODSI
Sr. Pedro Valcárcel - Director Operaciones y Control de Procesamiento de Datos
Sra. Yolanda Viera - Directora de Programación
Sra. Flor Morales - Analista de Sistemas Electrónicos II
Sra. Madeline Colón - Programadora Sistemas Electrónicos II
Sra. Vivian Elías - Programadora Sistemas Electrónicos I
Sra. Olga Ríos - Oficinista de Control
Sra. Lydia Rosado - Oficinista de Control
Todo el Personal de ODSI

**Registro Demográfico de Puerto Rico:**

José A. Torrado, M.S. - Director Registro Demográfico
Leonides Rosado, M.P.A. - Subdirectora Registro Demográfico
Todo el Personal de Codificación, Revisión, Control de Documentos, Entrada de Datos, Asuntos Legales, Pareo, Búsqueda, Microfilmación, Registradores Locales y Regionales

**Programa Graduado de Demografía, Escuela de Salud Pública, Recinto de Ciencias Médicas:**

Dr. José L. Vázquez Calzada - Catedrático
Dra. Zoraida Morales - Catedrática
Dra. Ana Luisa Dávila- Coordinadora Programa de Demografía
Prof. Judith Carnivali - Dir. Departamento Ciencias Sociales
Prof. Severo Rivera - Catedrático Asociado

**Junta de Planificación de Puerto Rico:**

Sra. Norma E. Burgos Andújar - Presidenta Junta de Planificación
Sr. José L. Jímenez - Analista de Planificación

# *Introducción*

## INTRODUCCION

Los nacimientos, defunciones, matrimonios y muertes fetales que ocurren en Puerto Rico, son registrados en las diferentes oficinas locales del Registro Demográfico que existen en la Isla. Los registradores locales cumplimentan y conservan transcripciones exactas de los certificados y envían los originales al Registro Demográfico Central, quien es custodio de los certificados originales. En las oficinas Centrales del Registro Demográfico los certificados son enumerados y revisados manualmente para la detección de omisiones e inconsistencias y se les da seguimiento a los errores. Una vez revisados, son codificados, tanto los datos demográficos como los legales y la causa muerte, siguiendo la Clasificación Internacional de Enfermedades, Novena Revisión (ICD-9). A las causas de muerte se les da seguimiento cuando existe duda sobre el diagnóstico.

El registro de nacimientos en Puerto Rico es muy completo: existen suficientes incentivos que motivan a los ciudadanos a inscribir los eventos vitales, hay acceso a los diferentes registros locales y casi la totalidad de los nacimientos ocurren en hospitales (99.7%). Pero sobre todo, existe una larga y sólida tradición en nuestra ciudadanía en cuanto a la importancia de tener un sistema de registro de eventos vitales (Registro Civil de 1885 al 1931 y Registro Demográfico desde 1931 hasta el presente), que parece ya ser parte importante de nuestro diario vivir.

De igual importancia es el registro de las defunciones, y de cobertura muy completa. Contrario a como sucede en otros países, en el nuestro, todas las causas de muerte en los certificados de defunción son certificadas por médicos: el 52 por ciento por los médicos de cabecera, el 37 por ciento por médicos basados en resultados de autopsia y expedientes o evidencia médica, el restante 11 por ciento también es certificado por médicos que utilizan otras fuentes.

La entrada de los datos de defunciones y muertes fetales al computador se hace en el Centro de Cómputos del Departamento de Salud, ubicado en la Oficina de Dedesarrollo de Sistemas de Información (ODSI). Los datos de nacimientos y matrimonios se entran al comutador mediante el uso de terminales localizados en la Oficina Central del Registro Demográfico. El Centro es custodio de los datos, que mantiene en cintas magnéticas y vela por la seguridad del sistema de nacimientos, cuyos datos se procesan en el Registro Demográfico y van por línea telefónica al Centro donde se almacenan en discos. En el Centro de Cómputos se diseñan los sistemas y se escriben los programas para editar los datos, cuadrarlos y poroducir las tabulaciones. Ademas, se producen las cintas de los datos requeridos para el Centro Nacional de Estadísticas de Salud y otras agencias gubernamentales. Se producen índices, informes y tablas estadísticas para diferentes usuarios y propósitos.

Las tabulaciones de Estadísticas Vitales generadas en el Centro de Cómputos son enviadas a la División de Estadísticas de la Secretaría Auxiliar de Planificación, Evaluación y Estadísticas, que tiene a su cargo el análisis y publicación de los mismos. La División, en estrecha colaboración con el Registro Demográfico y el Centro de Cómputos, tiene además, la responsabilidad por la calidad de las estadísticas y la comparabilidad de éstas con las de los estados de los Estados Unidos y otros países. Coordina con el Centro Nacional de Estadísticas de Salud del Centro para el Control de Enfermedades, los asuntos relacionados con las Estadísticas Vitales y se encarga de ofrecer a los usarios los datos solicitados.

Las Estadísticas Vitales son publicadas mediante el INFORME ANUAL DE ESTADISTICAS VITALES, por medio de BOLETINES INFORMATIVOS, informes y tabulaciones especiales. Muchas tabulaciones no se publican en los informes anuales, pero están a la disposición de los usuarios que las soliciten.

En este informe presentamos las Estadísticas Vitales más sobresalientes del año calendario 1993. Sugerimos al lector referirse a las secciones sobre las Notas Técnicas, Definiciones y Tasas, antes de utilizar las tablas del informe.

# *Definiciones*
# *Tasas*

## NOTAS TECNICAS

**ESTIMADOS POBLACIONALES** - Los estimados poblacionales por edad y sexo y la población por municipios son provistos por la Junta de Planificación.

**CAUSAS DE MUERTE**

- **ORDEN DE LAS CAUSAS** - Las causas de muerte están codificadas de acuerdo a la Novena Revisión de la Clasificación Internacional de Enfermedades. Hemos utilizado los criterios de la ordenación de muerte sugeridas por la Organización Mundial de la Salud, utilizando las listas estándares de 61 causas selectas de mortalidad infantil y las 72 causas selectas de mortalidad general que sugiere el Centro Nacional de Estadísticas de Salud.

- **INFECCION POR EL VIRUS DE INMUNODEFICIENCIA HUMANA CAUSANTE DEL SINDROME DE INMUNODEFICIENCIA ADQUIRIDA (SIDA)**

Los certificados de defunción en donde se señala el SIDA como la causa de muerte, son verificados con el Centro Latinoamericano de Enfermedades de Transmisión Sexual (CLETS). Una vez el CLETS corrobora que la persona falleció por SIDA, se codifica el SIDA como la causa principal de muerte, pasando el caso a contabilizarse como muerte por SIDA en las Estadísticas Vitales.

El 14 de agosto de 1987 se modificaron y/o revisaron los criterios de diagnóstico para la clasificación de los casos de SIDA (la modificación fue efectiva el 2 de septiembre de 1987). Antes de esa fecha, los pacientes debían reunir tres criterios para considerarse enfermos de SIDA, (probar la existencia de inmunodeficiencia, la presencia del virus y evidencia de una infección o enfermedad oportunista [1]). A partir de esa fecha se estableció que bastaba con que tuviera dos de los tres criterios para que un enfermo pudiera clasificarse con esa enfermedad. Por consiguiente, para el 1986 y años anteriores, existieron casos como posible SIDA donde la causa principal de muerte codificada en los certificados de defunción, (siguiendo las guías establecidas en esa fecha) fue la neumonía o algún otro tipo de enfermedad oportunista.

---

[1] Datos sobre los criterios fueron suministrados por el Programa para Vigilancia del SIDA, del CLETS.

## DEFINICIONES

**ADOLESCENTES** (Madres Adolescentes) - Madres menores de 20 años de edad.

**"APGAR SCORE"** - Medida resumen de una escala de 0-10, al 1er. y 5to. minuto de vida del infante, que toma en consideración el ritmo cardíaco, esfuerzo respiratorio, tonacidad muscular, irritabilidad y color.

**BAJO PESO AL NACER** - Cualquier recién nacido que independientemente de las semanas de gestación, pese 5 lbs. 8 oz. (<2500 grs.) o menos al nacer.

**DURACION DE LA GESTACION** - El número de semanas transcurridas entre el primer día de la concepción y la fecha del nacimiento.

**EDAD REPRODUCTIVA** - Edad de las mujeres entre los 15 y 44 años. (Anteriormente en Puerto Rico se incluían hasta los 49 años, pero en la actualidad la proporción de nacimientos desde los 45 años en adelante es muy reducida).

**ESTADO JURIDICO** (Legitimidad) - Nacimiento legítimo - niños de padres legalmente casados entre sí.

Nacimiento ilegítimo - niños cuyos padres viven en matrimonios consensuales o de madres que son solteras.

**MORTALIDAD NEONATAL** - Muerte de un recién nacido antes que éste tenga 28 días (hasta e incluyendo 27 días, 23 horas, 59 minutos del momento de nacer).

**MORTALIDAD PERINATAL** - El total de muertes neonatales, más las muertes fetales con 20 o más semanas de gestación.

**MORTALIDAD POSTNEONATAL** - Muerte de un infante entre los 28 días de edad, pero antes de cumplir su primer año de vida.

**MUERTE FETAL** - Muerte previa a la expulsión o extracción del vientre de la madre, del producto de la concepción humana, feto o placenta independientemente de la duración del embarazo; la muerte está indicada por el hecho de que luego de la expulsión o extracción, el feto no respira o enseña ninguna otra evidencia de vida como latidos del corazón, pulsaciones del cordón umbilical o movimientos definidos de los músculos voluntarios. Esta definición excluye la terminación de embarazos en forma inducida.

**MUERTE INFANTIL** - Muerte ocurrida en cualquier momento después de un nacimiento hasta, pero no incluyendo, un año de nacido (364 días, 23 horas, 59 minutos del momento de nacer).

**MUERTE MATERNA** - La muerte de una mujer por cualquier causa relacionada con o agravada por el embarazo o sus manejos (independientemente de la duración o localización del embarazo), pero no por causas accidentales o incidentales.

**NACIMIENTO VIVO** - La completa expulsión o extracción del vientre de la madre, del producto de la concepción humana, independientemente de la duración del embarazo y el cual después de dicha expulsión o extracción respire o muestre otra evidencia de vida, tal como latidos del corazón, pulsaciones del cordón umbilical o movimientos definidos de músculos voluntarios, haya sido o no cortado el cordón umbilical o aguantado a la placenta.

**ORDEN DE NACIMIENTO** - El total de nacimientos vivos que ha tenido la madre incluyendo el nacimiento actual.

**RAZON DE SEXO AL NACER** - El número de nacimientos varones por cada cien nacimientos del sexo femenino.

**FACTORES MEDICOS DE RIESGO**

**Anemia** - Nivel de hemoglobina de menos de 10.0 g/dl durante el embarazo o hematocrito de menos de 30% durante el embarazo.

**Cerviz Incompetente** - Se caracteriza por la dilatación sin dolor del cuello del útero en el segundo trimestre o temprano en el tercer trimestre del embarazo, con expulsión prematura de las membranas a través de la cerviz. Se inflan las membranas dentro de la vagina y es seguido por la rotura de la membrana y subsecuene expulsión del feto.

**Diabetes** - Desorden metabólico que se caracteriza por cantidad excesiva de orina y sed persistente; incluye juvenil, adulta y gestacional (durante el embarazo).

**Eclampsia** - La ocurrencia de convulsiones y/o coma, que no están relacionadas con otras condiciones cerebrales en mujeres con señales y síntomas de preeclapmsia.

**Enfermedad Cardíaca (Enfermedad del Corazón)** - Enfermedad del corazón durante el embarazo.

**Enfermedad aguda o crónica del pulmón** - Enfermedad de los pulmones durante el embarazo.

**Enfermedad Renal** - Enfermedad del riñón.

**Hemoglobinopatía** - Desorden de la sangre causado por la alteración en la estructura molecular de la homoglobina (por ejemplo, la anemia falciforme).

**Herpes Genital** - Infección de la piel del área genital por el virus del herpes simplex.

**Hidramnios/Oligohidramnios** - Cualquier exceso notable (hdramnios) o carencia (oligohidramnios) de líquido amniótico.

**Hipertensión Crónica** - Presión sangínea persistentemente mayor de 140/90, diagnosticada con anterioridad al comienzo del embarazo o antes de la 20ma. semana de gestación.

**Hipertensión Asociada al Embarazo** - Un aumento en la presión sanguínea de por lo menos, 30mm Hg la sistólica o 15mm Hg la diastólica en dos medidas tomadas con 6 horas de diferencia después de la 20ma. semana de gestación.

**Infante o Nacimiento Previo 4000 + grs** - El peso al nacer de un nacimiento vivo anterior fue de más de 4000 grs (8 lbs 14 oz).

**Infante o Nacimiento Previo Prematuro o Pequeño para su Edad Gestacional** - Nacimiento previo de un infante que no completó 37 semanas de gestación o que pesó menos de la 10ma percentila para edad gestacional, usando una tabla estándar de peso por edad.

**Sangramiento Uterino** - Cualquier sangramiento clínicamente significativo, durante el embarazo, tomando en consideración la etapa del embarazo; cualquier sangramiento del útero en el segundo o tercer trimestre del embarazo, antes del comienzo del parto.

**Sensibilidad al Factor Rh** - El proceso o estado de hacerse sensible al factor Rh, como cuando una madre Rh neativo está embarazada y el feto es Rh positivo.

## PROCEDIMIENTOS OBSTETRICOS

**Amniocentesis** - Perforación quirúrgica transabdominal del útero para obtener fluído amniótico a usarse en la detercción de desórdenes genéticos, anomalías fetales y madurez pulmunar del feto.

**Monitoreo Fetal Electrónico** - Monitoreo con instrumentos externos que se aplican al abdomen de la madre o con instrumentos internos con un electrodo que se adhiere al cráneo del feto y un cáteter a través del cuello de la matriz hasta la matriz para detectar las pulsaciones del corazón del feto y las contracciones uterinas.

**Inducción del Parto** - El inicio de contracciones uterinas antes de los síntomas espontáneos del parto, por medios médicos o quirúrgicos con el propósito de provocar el parto.

**Estimulación del Parto** - Uso de Oxitocina en un parto que ya comezó, con el próposito de acelerarlo.

**Tocolisis** - El uso de medicamntos para inhibir las contracciones prematuras del útero para prolongar la duración del embarazo y por consiguiente, evitar un nacimento prematuro.

**Ultrasonido** - Visualizar el feto y la placenta por medio de ondas de sonido.

## COMPLICACIONES DEL PARTO

**Febril** - Fiebre mayor de 100° F o 38° C que ocurra durante el parto.

**Meconio** - El meconio consiste en residuos no digeridos de líquido anmniótico que ha sido tragado, secreciones, excresiones y células de tejido del tracto gastrointestinal; moderadas o grandes cantidades de meconio en el líquido amniótico que se notan durante el parto.

**Rotura Prematura de Membra (Más de 12 horas)** - Rotura de las membranas en cualquier momento durante el embarazo y más de 12 horas antes del comienzo del parto.

**Placenta Abrupta** - Separación prematura del útero, de una placenta normalmente implantada.

**Placenta Previa** - Implantación de la placenta sobe o cerca de la apertura interna del útero.

**Convulsiones Durante El Parto** - Convulsiones de la madre durante el parto, por cualquier causa.

**Parto Precipitado (Menos de 3 horas)** - Parto extremadamente rápido, que tardó menos de 3 horas.

**Parto Prolongado (Más de 20 horas)** - Parto con progreso anormalmente lento, que duró más de 20 horas.

**Disfunción en el Parto** - Dificultad para progresar siguiendo un patrón normal de parto.

**Presentación de Nalgas (Breech)** - Cuando en el parto se presentan las nalgas del feto y no su cabeza.

**Desproporción Cefalopélvica** - La relación del tamaño, la presentación y la posición de la cabeza del feto con la pelvis materna, que evita la dilatación del cuello de la matriz y/o el descenso de la cabeza del feto.

**Prolapso del Cordón** - Expulsión prematura del cordón umblilical en el parto antes de que nazca el feto.

**Complicaciones por Anestesia** - Cualquier complicación durante el parto que haya sido causada por anestesia.

**Angustia Fetal** - Cuando hay signos de hipoxia fetal (deficiencia en la cantidad de oxígeno que llega a los tejidos fetales).

## CONDICIONES ANORMALES DEL RECIEN NACIDO

**Anemia** - Nivel de hemoglobina de menos de 13.0 g/dl, o hematocrito menor de 39 por ciento.

**Traumatismo (Lesión) al Nacer** - Limitación de la función o estructura del cuerpo del infante debido a influencias adversas ocurridas en el nacimiento.

**Síndrome de Alcoholismo Fetal** - Un síndrome de crecimiento y desarrollo prenatal alterado, que ocurre entre los infantes que nacen de madres cuyo consumo de alcohol durante el embarazo fue excesivo.

**Membrana Hialina/Síndrome de Dificutad Respiratoria (RDS)** - Un desorden principalmente de prematurez, cuya manifestación clínica es la dificultad respiratoria y la manifestación patológica. Son membranas hialinas en los pulmones y expansión incompleta de los pulmones en el momento del nacimiento.

**Síndrome de Aspiración de Meconio** - Aspiración de meconio por el feto o el recién nacido que afecta el Sistema respiratorio inferior.

**Ventilación o Respiración Artificial (Menor de 30 minutos)** - Método mecánico para ayudar al recién nacido con fallo respiratorio.

**Ventilación Artificial (30 minutos o más)** - Cuando se coloca al recién nacido en ventilador artificial por 30 minutos o más.

**Convulsiones** - Cualquier tipo de convulsión, no importa su etiología.

## ANOMALIAS CONGENITAS DEL NIÑO

**Anencefalia** - Ausencia de los hemisferios cerebrales.

**Espina Bífida/Meningocele** - Desarrollo anormal que se caracteriza por el cierre defectuoso de los huesos de la columna vertebral, a través del cual las meninges y el cordón espinal pueden o no sobresalir.

**Hidrocefalia** - Acumulación excesiva del líquido cerebroespinal dentro de los ventrículos del cerebro, con el consecuente engrandecimiento del cráneo.

**Microcefalia** - Cabeza significativamente pequeña.

**Otras Anomalías del Sistema Nervioso Central** - Otras anomalías del cerebro, columna vertebral y sistema nervioso.

**Malformaciones del Corazón** - Anomalías congénitas del corazón.

**Atresia/Estenosis Rectal** - Cuando por un defecto congénito hay ausencia o estrechez del recto, o éste está cerrado.

**Fístula Traqueo-esofágica o Atresia Esofágica** - Una comunicación anormal entre la tráquea y el esófago; la atresia esofágica es la ausencia congénita del esófago o cuando éste está cerrado (congénito).

**Omfalocele/Gastrosquisis** - Omfalocele es cuando existe una protuberancia o víscera abdominal por un defecto en la base del ombligo. En gastrosquisis, la víscera abdominal es protuberante a través de un defecto en la pared abdominal, por lo general al lado derecho del cordón umbilical.

**Genitales Malformados** - Anomalías congénitas de los órganos reproductivos.

**Agenesis Renal** - Ausencia de uno o ambos riñones.

**Otras Anomalías Urogenitales** - Otras anomalías congénitas relacionados con la reproducción y de los órganos excretores de la orina.

**Labio Leporino/Paladar Hendido** - El labio leporino en una fisura o apertura alargada en el labio; paladar hendido en una fisura en el paladar. Ambos resultan de fallas en el desarrollo embrionario.

**Polidactilia/Sindactilia/Adactilia** - Polidactilia es la presencia de más de cinco dedos en cada mano o pie; Sindactilia es cuando se tienen dedos unidos en manos o pies; Adactilia es la ausencia de dedos en las manos o pies.

**Pie Equino (Club Foot)** - Deformación en el pie, que se presenta torcido en su forma y/o posición.

**Hernia del Diafragma** - Hernia del contenido abdominal, a través del diafragma hacia la cavidad toráxica, que por lo general resulta en dificultad respiratoria.

**Otras Anomalías Musculoesqueletales/Integumentarias** - Son otras anomalías congénitas de los músculos, esqueleto o piel.

**Síndrome de Down** - El más común desorden cromosómico, que usualmente resulta de tener un cromosoma adicional (trisomía del cromosoma 21).

**Otras Anomalías Cromosómicas** - Todas las demás aberraciones cromosómicas.

## Método del Parto

**Tasa de Cesáreas Primarias** - Es el por ciento de nacimientos por cesárea. Cesáreas ÷ Total de nacimientos x 100.

**Tasa de Cesáreas Primarias** - Es la medida que relaciona el total de mujeres que tuvieron una primera cesárea con aquellas que tuvieron nacimientos pero que nunca han tenido un parto por cesárea. En el denominador de esta tasa se incluyen todos los nacimientos, excepto aquellos cuyo método del parto es una cesárea repetida, vaginal después de cesárea (VBAC) o método no especificado.

**Tasa de Cesáreas Repetidas** - Es el por ciento de todos los partos por cesáreas a mujeres que tuvieron su segunda (o subsiguiente) cesárea.

**Tasa de Parto Vaginal Despúes de Cesárea (VBAC)** - Se computa dividiendo el total de VBAC + Cesáreas repetidas, es decir, las mujeres con cesáreas previas.

**TASAS**

**DEFUNCIONES**

| | | |
|---|---|---|
| Tasa Ajustada de Mortalidad (método directo) | = | Defunciones esperadas en una población estándar (a las personas en esa población estándar aplicamos las tasas de mortalidad por grupos de edad de otra población) / Población estándar x 100,000 |
| Tasa Bruta (cruda) de Mortalidad | = | Defunciones / Población total estimada x 1,000 |
| Tasa de Mortalidad Fetal | = | Muertes fetales informadas / Nacimientos vivos más muertes fetales x 1,000 |
| Tasa de Mortalidad Infantil | = | Defunciones menores de 1 año / Total de nacimientos vivos x 1,000 |
| Tasa de Mortalidad Materna | = | Muertes atribuidas a condiciones maternas / Nacimientos vivos durante el mismo período x 1,000 |
| Tasa de Mortalidad Neonatal | = | Defunciones menores de 28 días / Total de nacimientos vivos x 1,000 |
| Tasa de Mortalidad Perinatal | = | Muertes fetales de 20 o más semanas de gestación, más muertes neonatales / Total de nacimientos vivos más muertes fetales x 1,000 |
| Tasa de Mortalidad Postneonatal | = | Defunciones entre 28 días pero menores de 1 año / Total de nacimientos vivos x 1,000 |
| Tasa de Mortalidad por Causa Específica | = | Defunciones por causa específica / Total de Población estimada x 100,000 |
| Tasa Específica de Mortalidad | = | Defunciones en unos grupos de edad específico / Población estimada en los mismos grupos de edad x 1,000 |

**NACIMIENTOS**

| | | |
|---|---|---|
| Tasa Bruta (cruda) de Natalidad | = | Número de nacidos vivos a mujeres de todas las edades durante un año calendario / Población total estimada a mitad de año x 1,000 |
| Tasa Bruta de Reproducción | = | Tasa total (global) de fecundidad x la proporción de nacimientos del sexo femenino |
| Tasa Específica de Fecundidad | = | Número de nacimientos vivos a madres en una edad específica / Población femenina en ese grupo de edad x 1,000 |
| Tasa General de Fecundidad | = | Número de nacimientos vivos de mujeres de todas las edades durante un año calendario / Población estimada de mujeres de 15 a 44 años x 1,000 |
| Tasa Total de *Fecundidad | = | La suma de las tasas específicas de fecundidad multiplicada por el intervalo de edad. (Esta tasa puede ser computada usando años de edad sencilla) |

*También conocida como la Tasa Global de Fecundidad

# *Datos Sobresalientes*

## POBLACION

La población total de Puerto Rico estimada para 1993 fue de 3,621,538 [2] habitantes; 1.2 por ciento más que en 1992 (3,578,980). Unas 36,748 personas se sumaron a la población total como producto del crecimiento natural (la diferencia entre 65,242 nacimientos y 28,494 defunciones).

## NACIMIENTOS

Unos 65,093 nacimientos (99.8%) ocurrieron en hospitales, el 60.5 por ciento (39,440) en hospitales del gobierno y el 39.3 por ciento (25,653) en hospitales privados; 149 ocurrieron en el hogar y otros sitios.

Unos 6,235 nacimientos fueron de bajo peso al nacer (5 lbs. 8 oz. o menos), lo que representa una proporción de 9.50 por ciento. En el año 1992 esta proporción fue de 9.40 por ciento. A partir del año 1988 se han observado aumentos en el bajo peso. La proporción de muy bajo peso (3 lbs. 4 oz o menos) fue de 1.19 por ciento con 780 nacimientos (1.16% en 1992). Del total de nacimientos bajo peso (6,235) el 23.4 por ciento (1,459) fueron de madres adolescentes.

Hubo 12,820 nacimientos a menores de 20 años (madres adolescentes) (19.6%) La proporción observada en 1992 fue de 19.2 por ciento.

El 40.4 por ciento de los nacimientos fueron a madres solteras (26,377 de 65,242). Esta proporción fue de 39.3 en 1992 y continúa en aumento ininterrumpido desde 1977, cuando fue de 18.6 por ciento. En el 61.7 por ciento de los nacimientos a madres adolescentes, estas eran solteras (7,915 de 12,820).

El 75.9 por ciento de los nacimientos (49,580) comenzaron el cuidado prenatal en el primer trimestre de embarazo. Esta proporción fue de 75.4 por ciento en el año 1992.

El 1.1 por ciento de las madres no tuvieron cuidado prenatal (686 madres). Estas eran en su mayoría solteras (580 de 686, un 84.5%). Entre las madres con menos de cinco (5) visitas prenatales (3,926), el 66.6 por ciento (2,614) eran solteras.

Unos 20,593 nacimientos fueron por cesárea (31.6%). En todo el año 1992 el por ciento de cesáreas fue de 31.3 por ciento. La tasa mayor de cesáreas continúa reportándose en las instituciones privadas.

## MORTALIDAD GENERAL

Las enfermedades del corazón y los neoplasmas malignos (cáncer) fueron las dos principales causas de muerte responsables en conjunto del 36.2 por ciento del total de defunciones. Las enfermedades del corazón continúan siendo la primera causa de muerte. Unas 5,897 personas murieron por esta causa en 1993.

En conjunto, las enfermedades cardiovasculares (incluyendo aquí las enfermedades del corazón, cerebrovasculares, hipertensión y arterioesclerosis) causaron 8,530 muertes que equivalen al 29.9 por ciento del total de muertes ocurridas.

Entre los varones hubo 2,649 muertes por cáncer, siendo el más frecuente el de próstata; con 505 muertes (19.1%), seguido por el de tráquea, pulmón y bronquios, con 402 (15.2%).

---

[2] Población al 1 de julio, estimada por la Junta de Planificación.

Entre las hembras hubo 1,782 muertes por cáncer. El cáncer de la mama ocupó el primer lugar (290 muertes) 16.3 por ciento, seguido por el cáncer del colon (170 muertes) 9.5 por ciento.

La diabetes mellitus ocupó el tercer lugar, al igual que en los años anteriores. Por esta causa murieron 1,876 personas, el 6.6 por ciento del total de muertes en 1993. En el año 1992 causó 1,836 muertes.

Las enfermedades cerebrovasculares fueron la cuarta causa, con 1,443 (5.3%) muertes. Esta causa fue la quinta en 1992 y causó 1,285 muertes (4.7%), lo que representa un incremento de 10.9 por ciento en este año.

La quinta causa de muerte lo fue la Infección por el Virus de Inmunodeficiencia Humana, virus causante del Síndrome de Inmunodeficiencia Adquirida (SIDA), se informaron 1,433 muertes; de estas muertes, 1,148 (80.1%) fueron varones y 285 (19.9%) fueron hembras.

Los accidentes fueron la sexta causa de muerte en 1993. Se registraron 1,236 (4.5%) defunciones. El total de muertes por accidentes en 1992 fue de 1,209 y ocupó el mismo lugar. Los homicidios fueron 959, lo que representa un 3.5 por ciento del total de las muertes en el 1993.

Las neumonías e influenza, fueron la séptima causa de muerte en el 1993, causando 1,175 (4.3%) defunciones.

La enfermedad pulmonar obstructiva crónica (C.O.P.D. [3] por sus siglas en inglés), los homicidios y la enfermedad hipertensiva fueron las causas octava a la décima de muertes. Se informaron 959 muertes por homicidio, lo que representa un 3.4 por ciento del total de las muertes en 1993.

La cirrosis y enfermedades del hígado se encuentran en undécimo lugar.

Las condiciones originadas en el período perinatal fueron la causa número doce, la septicemia y la nefritis y nefrosis ocuparon el decimotercero y decimocuarto lugar. La arterioesclerosis fue la causa número quince.

**MORTALIDAD INFANTIL**

El análisis obtenido de los datos de los certificados de defunción de menores de un año de Puerto Rico, muestran para el año 1993 una tasa de mortalidad infantil de 13.4 por cada mil nacimientos vivos (874 muertes infantiles entre 65,242 nacimientos ocurridos). Se reportaron 52 muertes infantiles más que en el 1992 (822 muertes infantiles).

Entre las 874 muertes de menores de un año ocurridas en 1993, unas 630 ocurrieron en el período neonatal (menores de 28 días de vida) y 244 en período postneonatal (desde los 28 días, pero sin lograr alcanzar su primer año).

Las Regiones de Bayamón, Mayaguez y la Subregión de Fajardo mostraron reducciones en la tasa de mortalidad infantil de 1993 con relación al año 1992.

La Región de Ponce tuvo la tasa de mortalidad infantil más alta (15.5). En las Regiones de Arecibo, Caguas, Ponce, Metropolitana y la Subregión de Aguadilla, las tasas de mortalidad infantil aumentaron entre 1992 y 1993, observándose el aumento más marcado en la Región de Ponce donde la tasa de mortalidad infantil aumentó a 15.5 de 12.8, un 21 por ciento de aumento entre 1992 y 1993.

---

[3] Esta causa (COPD) incluye las muertes por bronquitis, enfisema, asma, bronquioectasia, alveolitis alérgica y bronquiolitis.

# CERTIFICADO DE NACIMIENTO (BIRTH CERTIFICATE)

NUMERO DE NACIMIENTO (BIRTH NUMBER)

## Datos sobre el Niño (a)

1. NOMBRE Y APELLIDOS DEL NIÑO (NAME AND SURNAMES OF CHILD)

2. SEXO: (1) VARON (MALE) ☐ (2) HEMBRA (FEMALE) ☐

3. HORA Y FECHA DE NACIMIENTO (Time and Date of Birth): HORA (Hour) ☐ A.M. ☐ P.M. | MES (Month) | DIA (Day) | AÑO (Year)

4. FECHA DE REGISTRO (Registration Date): MES (Month) | DIA (Day) | AÑO (Year)

5. LUGAR DE NACIMIENTO (Birthplace)
5a. (1) Hogar (Home) (2) En Ruta (On Route) (3) Hospital (Hospital) (4) Otro Sitio (Other)
5b. Nombre del Hospital o Institución - Si no nació en Hospital o Institución, indique calle y número - (Name of Hospital or Institution. If not institution give street and number)
5c. Zona (1) Urbana (2) Rural
6. DOMICILIO DEL NIÑO (Dwelling Place)
5d. BARRIO O URBANIZACION (Barrio o "Urbanized Area")
5e. MUNICIPIO (Municipality)
Municipio
PUERTO RICO

## Padre y Madre

PADRE (Father)

7. NOMBRE Y APELLIDOS (Name and Surnames)
8. LUGAR DE NACIMIENTO (Birthplace)
a. MUNICIPIO
b. Estado o País (State or Country)
9. Residencia habitual del padre
a. Municipio
b. Estado o País

MADRE (Mother)

10. NOMBRE Y APELLIDOS (Name and Surnames)
11. LUGAR DE NACIMIENTO (Birthplace)
a. MUNICIPIO
b. Estado o País (State or Country)
12. Residencia habitual de la madre
a. Urbanización o Barrio
b. Municipio
c. Zona
d. Calle y Número
e. Estado o País

12f. Dirección Postal de la madre (Si es igual a la residencia, indique esto al Zip Code (Mother's Mailing Address)

## Informante

13. Certifico que la información personal provista en este certificado es correcta a mi mejor entender. ( ) Autorizo ( ) No Autorizo que el número de Seguro Social se asigne al niño y se informe al Departamento de Salud. (I certify that the personal information on this certificate is correct to the best of my knowledge and belief. ( ) I authorize ( ) Do not authorize that the child be assigned Social Security Number and released to the Department of Health)

13a. Nombre del informante (Name of informant)
13b. Firma y/o testigo (Signature of informant)
13c. Dirección Postal (Mailing Address)
13d. Relación con el niño (Relation to child)

## Quién Atendió y Certificó

CERTIFICADO DE ASISTENCIA MEDICA

14. Certifico que este niño (a) nació vivo (a) en la hora, fecha y sitio arriba indicado.

14a. Nombre del que certifica
14b. Firma
14c. Fecha de la Firma: Mes | Día | Año
14d. Título: ☐ Médico ☐ Comadrona ☐ Administrador del Hospital ☐ Madre (sin asistencia) ☐ Enfermero ☐ Otro (Especifique) _____
14e. Licencia del Médico que certifica
14f. Dirección

15. Nombre y título del que atendió el parto si no es el que certifica
15a. Nombre
15b. Título: ☐ Médico ☐ Comadrona ☐ Administrador del Hospital ☐ Madre (sin asistencia) ☐ Enfermero ☐ Otro (Especifique) _____
15c. Dirección postal del que atendió el parto

## Datos Médicos

INFORMACION PARA USO MEDICO Y DE SALUD

El médico debe ser el principal responsable de completar y/o revisar la información en los apartados 16 al 24. El médico deberá verificar estos apartados antes de firmar el certificado.

16. ¿Fue la madre trasladada antes del parto? ☐ Sí ☐ No
Si lo fue, indique de cuál institución:
17. ¿Fue el infante trasladado? ☐ Sí ☐ No
Si lo fue, indique a cuál institución:

18. Fecha en que comenzó último menstruación normal: Mes Día Año
19. Mes del embarazo cuando inicia prenatal
20. Total visitas prenatales
21. Apgar Score: 1 min. | 5 min.
22. Peso al Nacer
23. Tamaño al Nacer
24. Duración del Embarazo _____ Semanas
25. Este Parto fue: ☐ Sencillo ☐ Doble ☐ Triple ☐ Más
26. Orden del Nacimiento en Partos Múltiples: ☐ 1ro. ☐ 2do. ☐ 3ro. ☐ Más

NOTA AL REGISTRADOR: El Registro Demográfico devolverá para que se rehaga todo certificado que se reciba con borraduras o alteraciones hechas en violación a las disposiciones de la Ley de Registro Demográfico.

# INSTRUCCIONES PARA DECLARAR LA MUERTE Y CERTIFICACION MEDICA

Las principales responsabilidades del médico en el registro de una defunción, son: declarar y especificar la causa de la muerte, (Causa y Circunstancia).

El médico que atendió al fallecido durante su enfermedad ("attending physican" o médico de cabecera) es responsable de certificar la causa de muerte porque es éste el más indicado para decidir cuál de varias condiciones, fue directamente responsable del fallecimiento y cuáles condiciones antecedentes, si alguna, dieron lugar o llevaron a la causa directa. En muchos casos el médico de cabecera será el que declare la muerte y establezca cuál fue la causa inmediata.

Unicamente cuando el médico de cabecera no esté disponible para certificar la causa y declarar el hecho de la muerte, deberá otro médico declarar la misma.

El médico que certifica es quien determina la causa de muerte. Si el médico que atendió al fallecido durante la enfermedad que le causó la muerte ("attending physican" o de cabecera) está disponible para certificar y declarar el fallecimiento, No es necesario que llene los apartados 19a al 19c, pero debe completar los apartados 20 al 29d.

El médico que declara la muerte es el que determina que el fallecido está legalmente muerto. Será responsable de completar los apartados 19a al 19c únicamente cuando el médico de cabecera no esté disponible en el momento y hora de la muerte para certificarla.

| 36. ¿RECIBIO TRATAMIENTO EN ALGUNA INSTITUCION DURANTE SU ULTIMA ENFERMEDAD? (Para ser cumplimentada por el Médico) | 37. ESTADO JURIDICO DEL FALLECIDO | 38. Fué Donado: | 39. PARA USO DEL NIVEL CENTRAL |

## MORTALIDAD GENERAL POR LAS 72 CAUSAS SELECTAS
## GENERAL MORTALITY FOR 72 SELECTED CAUSES

Causes of Death (Ninth Revision International Classification of Diseases, 1975)

| | |
|---|---|
| All Causes | |
| Shigellosis and Amebiasis | 004,009 |
| Certain Other Intestinal Infections | 007-009 |
| Tuberculosis | 010-018 |
| Tuberculosis of Respiratory System | 010-012 |
| Other Tuberculosis | 013-018 |
| Whooping Cough | 033 |
| Streptococcal Sore Throat, Scarlatina and Erysipelas | 034-035 |
| Meningococcal Infection | 036 |
| Septicemia | 038 |
| Acute Poliomyelitis | 045 |
| Measles | 055 |
| Viral Hepatitis | 070 |
| Syphilis | 090-097 |
| All Other Infectious and Parasitic Diseases | 001-003,005 020-032, 037,039-041, 046-054, 056-066, 071-088,098-139 |
| Malignant Neoplasms, Including Neoplasms of Lymphatic and Hematopoietic Tissues | 140-208 |
| Malignant Neoplasms of Lip, Oral Cavity and Pharynx | 140-149 |
| Malignant Neoplasms of Digestive Organs and Peritoneum | 150-159 |
| Malignant Neoplasms of Respiratory and Intrathoracic Organs | 160-165 |
| Malignant Neoplasms of Breast | 174-175 |
| Malignant Neoplasms of Genital Organs | 179-187 |
| Malignant Neoplasms of Urinary Organs | 188-189 |
| Malignant Neoplasms of All Other and Unspecified Sites | 170-173, 190-199 |
| Leukemia | 204-208 |
| Other Malignant Neoplasms of Lymphatic and Hematopoietic Tissues | 200-203 |
| Benign Neoplasms, Carcinoma in Situ and Neoplasms of Uncertain Behavior and of Unspecified Nature | 210-239 |
| Diabetes Mellitus | 250 |
| Nutritional Deficiencies | 260-269 |
| Anemias | 280-285 |
| Meningitis | 320-322 |
| Major Cardiovascular Diseases | 390-448 |
| Diseases of Heart | 390-398, 402, 404-429 |
| Rheumatic Fever and Rheumatic Heart Disease | 390-398 |
| Hypertensive Heart Disease | 402 |
| Hypertensive Heart and Renal Disease | 404 |
| Ischemic Heart Disease | 410-414 |
| Acute Myocardial Infarction | 410 |

Cont. Apéndice 5

MORTALIDAD GENERAL POR LAS 72 CAUSAS SELECTAS
GENERAL MORTALITY FOR 72 SELECTED CAUSES

Other Acute and Subacute Forms of Ischemic Heart Disease . . . . . 411
Angina Pectoris . . . . . 413
Old Miocardial Infarction and Other Forms of Chronic Ischemic Heart Disease . . . . . 412-414
Other Diseases of Endocardium . . . . . 424
All Other Forms of Heart Disease 415-423, 425-429
Hypertension With or Without Renal Disease . 401, 403
Cerebrovascular Diseases . . . . . 430-438
Intracerebral and Other Intracranial Hemorrhage . . . . . 431-432
Cerebral Thrombosisand Unspecified Occlusion of Cerebral Arteries . . . . . 434.0, 434.9
Cerebral Embolism . . . . . 434.1
All Other and Late Effects of Cerebrovascular Diseases . . . 430, 433, 435-438
Atherosclerosis . . . . . 440
Other Diseases of Arteries, Arterioles and Capillaries . . . . . 441-448
Acute Bronchitis and Bronchiolitis . . . . . 466
Pneumonia and Influenza . . . . . 480-486
Pneumonia . . . . . 480-486
Influenza . . . . . 487
Chronic Obstructive Pulmonary Diseases and Allied Conditions . . . . . 490-496
Bronchitis and Chronic Unspecified . . . . . 490-491
Emphysema . . . . . 492
Asthma . . . . . 493
Other Chronic Obstructive Pulmonary Diseases and Allied Conditions . . . . . 494-496
Ulcer of Tomach and Duodenum . . . . . 531-533
Appendicitis . . . . . 540-543
Hernia of Abdominal Cavity and Intestinal Obstruction Without Mention of Hernia . . . . . 550-553, 560
Chronic Liver Disease and Cirrohosis . . . . . 571
Colelithiasis and Other Disorders of Gallbladder . . . . 574-575
Nephritis, Neprotic Syndrome and Nephrosis . . . . . 580-589
Acute Glomerulonephritis, Nephritis and Nephropathy, Not Specified as Acute or Chronic, and Renal Sclerosis, Unspecified . . . . . 582-583, 587
Renal Failure, Disorders Resulting from Impaired Renal Function, and Small Kidney of Unknown Cause . . . . . 584-586, 588-589
Infections of Kidney . . . . . 590
Hyperplasia of Prostate . . . . . 600
Complications of Pregnancy, Childbirth, and the Puerperium . . . . . 630-676
Pregnancy With Obstructive Outcome . . . . . 630-638

| | |
|---|---|
| Other Complications of Pregnancy, Childbirth, and the Puerperium | 640-676 |
| Congenital Anomalies | 740-759 |
| Certain Conditions Originating in the Perinatal Period | 760-779 |
| Birth Trauma, Intrauterine Hypoxia, Birth Asphysia, and Respiratory Distress Syndrome | 767-769 |
| Other Conditions Originating in the Perinatal Period | 760-766, 770-779 |
| Symptoms, Signs and Ill-defined Conditions | 780-799 |
| All Other Diseases | Residual |
| Accidents and Adverse Effects | E800-E949 |
| Motor Vehicle Accidents | E810-E825 |
| All Other Accidents and Adverse Effects | E800-E807, E826-E949 |
| Suicide | E950-E959 |
| Homicide and Legal Intervention | E978 |
| All Other External Causes | E980-E999 |

Apéndice 6

# MORTALIDAD INFANTIL POR LAS 61 CAUSAS SELECTAS
# INFANT MORTALITY BY 61 SELECTED CAUSES

Causes of death (Ninth Revision International Classification of Disease, 1975)

All Causes.....
Certain Intestinal Infections.....008-009
Whooping Cough.....033
Meningococcal Infection.....036
Septicemia.....038
Viral Diseases.....045-079
Congenital Syphilis.....090
Remainder of Infectious and Parasitic Diseases.....001-007, 010-032, 034-035, 037, 039-041, 080-088, 091-139
Malignant Neoplasms, Including Neoplasms of Lymphatic and Hematopoietic Tissues.....140-208
Benign Neoplasms, Carcinoma in Situ and Neoplams of Uncertain Behavior and of Unspecified Nature.....210-239
Diseases of Thymus Gland.....254
Cystic Fibrosis.....277.0
Diseases of Blood and Blood-forming Organs.....280-289
Meningitis.....320-322
Other Diseases of Nervous System and Sense Organs.....323-389
Acute Upper Resporatory Infections.....460-465
Bronchitis and Bronciolitis.....466, 490-491
Pneumonia and Influenza.....480-487
    Pneumonia.....480-486
    Influenza.....487
Remainder of Disease of Respiratory System.....470-478, 492-519
Hernia of Abdominal Cavity and Intestinal Obstruction Without Mention of Hernia.....550-553, 560
Gastritis, Duodenitis and Noninfective Enteritis and Colitis.....535, 555-558
Remainder of Diseases of Digestive System.....520-534, 536-543, 562-579
Congenital Anomalies.....740-759
    Anencephalus and Similar Anomalies.....740
    Spina Bifida.....741
    Congenital Hydrocephalus.....742.3
    Other Congenital Anomalies of Central Nervous System and Eye.....742.0-742.2, 742.4-742.9, 743
    Congenital Anomalies of Heart.....745-746
    Other Congenital Anomalies of Circulatory System.....747
    Congenital Anomalies of Respiratory System.....748
    Congenital Anomalies of Digestive System.....749-751
    Congenital Anomalies of Genitourinary System.....752-753
    Congenital Anomalies of Musculoskeletal System.....754-756
    Down's Syndrome.....758.0
    Other Chromosomal Anomalies.....758.1-758.9

Cont. Apéndice 6

MORTALIDAD INFANTIL POR LAS 61 CAUSAS SELECTAS
INFANT MORTALITY FOR 61 SELECTED CAUSES

All Other and Unspecified Congenital Anomalies.....744, 757, 759
Certain Conditions Originating in the Perinatal Period....760-779
Newborn Affected by Maternal Conditions Which May be Unrelated to Present by Pregnancy.....760
Newborn Affected by Maternal Complications of Pregnancy.....761
Newborn Affected by Complications of Placenta, Cord and Membranes.....762
Newborn Affected by Other Complications of Labor and Delivery.....763
Slow Fetal Growth and Fetal Malnutrition.....764
Disorders Relating to Short Gestation and Unspecified Low Birthweight.....765
Disorders Relating to Long Gestation and High Birthweight.....766
Birth Trauma.....767
Intrauterine Hypoxia and Birth Asphyxia.....768
Fetal Distress in Liveborn Infant.....768.2-768.4
Birth Asphyxia.....768.5-768.9
Respiratory Distress Syndrome.....769
Other Respiratory Conditions of Newborn.....770
Infections Specific to the Perinatal Period.....771
Neonatal Hemorrhage.....772
Hemolytic Disease of Newborn, Due to Insoimmunization, and Other Perinatal Jaundice.....773-774
Syndrome of "Infant of a Diabetic Mother" and Neonatal Diabetes Mellitus.....775.0-775.1
Hemorrhagic Disease of Newborn.....776.0
All Other and Ill-defined Conditions Originating in the Perinatal Period.....775.2-775.9, 776.1-779
Symptoms, Signs and Ill-defined Conditions.....780-799
Sudden Infant Death Syndrome.....798.0
Symptoms, Signs and All Other Ill-Defined Conditions.....780-797, 798.1-799
Accidents and Adverse Effect.....E800-E949
Inhalation and Ingestion of Food of Other Object Causing Obstruction of Respiratory Tract or Suffocation.....E911-E912
Accidental Mechanical Suffocation.....E913
Other Accidental Causes and Adverse Effects.....E800-E910, E914-E949
Homicide.....E960-E969
Child Battering and Other Maltreatment.....E967
Other Homicide.....E960-E966, E968-E969
All Other Causes.....Residual
