FOREWARD

This publication presents detailed information on the external trade of the Commonwealth of Puerto Rico for fiscal year 1965. Due to changes in schedules effective January 1965, the information for fiscal year is presented in two periods. One which cover the period July to December 1964 and the other January to June 1965. Commodity numbers for the period July to December 1964 are comparable to those of previous year but those corresponding to the period January-June 1965 are not comparable. That's why the information for the two semesters are presented separately instead of presting data for the whole fiscal year.

The data on the external trade of Puerto Rico are compilled by the Bureau of the Census of the United States Department of Commerce. The Planning Board is the recipient of monthly summary machine tabulations and the respective punched cards containing detailed statistics on foreign trade by commodities and by countries. The data here presented were prepared from these cards. The works on foreign trade statistics is under the direct supervision of Miss Lucy Arce.

The reader may refer to publications of the United States Bureau of the Census for specific definitions and statements of what is included in these statistics. However the following summary description of the data may be helpful:

I- SHIPMENTS OF MERCHANDISE FROM THE UNITED STATES TO PUERTO RICO.

These statistics are based on shipper's export declarations filled at the time of export from the United States. The value is based on the selling price (or on cost if not sold) including inland freight insurance and other charges to border point or seaport. It is f.a.s. (free alongside ship) in the part of embarcation. It should not include ocean freight marine insurance or other charges incurred beyond the part of exportation. Shipments by all methods of conveyance are included. Only shipments from Continental United States are included; shipments from Virgin Islands and Guam to Puerto Rico are included in data on shipments to United States from those areas as published by the U. S. Department of Commerce but are not shown separately. Data are not available on shipments to Puerto Rico from Alaska, Hawaii, Samoa and other U. S. territories.

Shipments of military and naval equipment and supplies for the use of the United States Armed Force and shipments by U. S. Government agencies of office furniture equipment and supplies for the use of such agencies are not included in the statistics.

Data on shipments from United States are presented according to the commodity classifications provided in schedule B. (Statistical classification of Domestic and Foreign Commodities Export from the United States) which contains commodity classifications. There is no commodity detailed available on individual shipments value at less than $100. The total value of these shipments estimated on a sample basis is shown under schedule B. commodity classification 99920 for the period covering July-December 1964 and under commodity number 931.0040 for the period January-June 1965.

II- IMPORTS INTO PUERTO RICO FROM FOREIGN COUNTRIES.

These imports statistics are based on regular U.S. Custom entries of merchandise filled by importers through the Customs District of Puerto Rico. The series presented here refers to "Imports for Consumption", that is it includes imports for direct consumption plus withdrawals from bonded warehouses. These statistics include government as well as nongovernment shipments of merchandise from foreign countries. However, American goods returned by the U. S. Armed Forces for their own use are excluded. The value are in general based on market or selling prices, f.o.b. the exporting country. Transportation cost to Puerto Rico may inadvertenly be included in case of merchandise which is not subject to an import duty based on value. United States imports duties are excluded.

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. Where the country of origin is not known, the country of shipments is shown. Data on imports from Foreign Countries are available at the Puerto Rico Planning Board, Economic Indexes Section according to the seven digit commodity descriptions established in schedule T.S.U.S.A. (Tariff Schedules of the United States Annotated), published by the U.S. Department of Commerce.

III- SHIPMENTS FROM PUERTO RICO TO THE UNITED STATES.

These are base on shipper's export declarations filled with the U.S. Custom in Puerto Rico. The principle governing the filling of these declarations and the coverage of these statistics are the same of those on shipments from the United States of Puerto Rico. The shipments to United States are tabulated according to the commodity classification published by the U.S. Bureau of the Census in Schedule P. (Statistics Classification of Domestic and Foreign Commodity Exported from the United States).

IV- EXPORT FROM PUERTO RICO TO FOREIGN COUNTRIES

These are likewise based on Shipper's Export declaration filled by the exporters at the port of embarcation in Puerto Rico. The value of shipments is based on the selling price (or on cost if not sold): including inland freight, insurance and other charges to the place of export. Merchandise shipped through Puerto Rico in transit from one foreign country to another is not reported as export, but imported merchandise which has cleared through Customs and which is re-exported without processing is covered separately as exports of foreign merchandise and included in this table in the corresponding commodity classifications. Export from Puerto Rico to foreign countries are classified according to Schedule B, which is the schedule regularly used to classify United States Exports. In January 1965 this Schedule B was revised. There is no commodity detail available for shipments value less than $100 and the total value of such exports appears under commodity classification 99920. After January 1965 such exports appears under commodity number 931.0040.

The country of destination is defined as the place where merchandise is to be consumed further processed or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited for statistical purposes to the country to which it is consigned.

V- SHIPMENTS OF MERCHANDISE FROM PUERTO RICO TO VIRGIN ISLAND.

These statistics are based on shipper's export declarations, filled with the collector of Customs at the time the merchandise is shipped from Puerto Rico to Virgin Island, cover shipments by all method of transportation. The value is based on the selling price (or on cost if not sold) including inland freight, insurance and other charges to the place of shipments.

The figures shown in this report are presented according to the commodity classification provided in schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). Detailed information on individual shipments valued under $100 are excluded. Statistics covering such shipments are combined under schedule B commodity number 99920. After January 1, 1965 under commodity number 931.0040.

VI- SHIPMENTS OF MERCHANDISE FROM VIRGIN ISLANDS TO PUERTO RICO.

These imports statistics are based on the import entry, which importers are required to filled at the Custom District of Puerto Rico.

The value are in general based in market or selling price, and are f.o.b. Transportation cost to Puerto Rico may inadvertenly be included because merchandise is not subject to on import duty based on value. Commodity information is reported according to the classification established in T.S.U.S.A. (Tariff schedule of the United States Annotated).

Monthly statistics are maintained in the Economic Indexes Section, Division of Statistics, Bureau of Economics and Social Analisis of the Planning Board and will be furnished to any interested person on request. New products exported by Fomento Plants are published in the "Indicadores Economicos", a monthly publication. Data on trade between Puerto Rico and the United States are also published by the U.S. Bureau of the Census in the monthly report number FT 800 (U.S. Trade in Merchandise and Gold and Silver with U.S. Territories and Possessions.)
